

***Experiential activities referring to
seven forms of "making money" –
Alchemy model***

Avi Goren-Bar, Ph.D.

◦ ***Kalkinatio -***

Increasing temperature to create more energy for making more money.

Colored rice grains spread in the room, participants are required to collect as many rice -grains as possible, every 5 minutes leader is counting their collecting production, every 5 minutes they are expected to double the number of rice-grains they had collected.

Solutio –

***Turning one material into another by means of
a creative longitudinal process***

Use silicon glue sticks to create a necklace.

° ***Kagulation***

condensing material by pulling out wasted components

Members of group get clay very wet, they are asked to throw it against board, reduce moisture percentage of the clay and turn it into a sculpture of a three stories house.

◦ *Sublimatio*

Gradual change of material by gradual changing processes such as learning, growing, gradual heating

Members of group invited to break violently “Kalkar” boards, collect the broken pieces and create art work from the remains.

° **Mortification**

Inevitable darkness, state of incubation, here emphasis is on the decreasing of activities which reduces the "Doing" state and enables "Being" states here new ideas may onset

Members of group are asked to find convenient place, locate themselves, think about a problem, sit in darkness, meditate and arrive into original crazy solution

◦ *Separation*

analysis and reproduction of innovative product derived from insights

Group receives pile of printed words and is required by cutting the words into letters, create new words and write a poem

Conunctio

Mixing and integrating to arrive into a new product

*Members of group get materials for chocolate balls
and bake together*
